

Computer Engineering

Course Notes – Topic-wise Overview

Page 1: Programming & Algorithms

Topics covered:

- Problem solving and algorithms
- Programming concepts
- Data structures
- Searching, sorting and complexity

Learning Focus

This section introduces the important concepts of programming & algorithms. Students can use these topics as a starting point for lectures, assignments, revision and further study. Practical examples and laboratory activities can be added according to the college syllabus.

Page 2: Computer Systems

Topics covered:

- Computer organization
- CPU and memory
- Digital logic
- Computer architecture and performance

Learning Focus

This section introduces the important concepts of computer systems. Students can use these topics as a starting point for lectures, assignments, revision and further study. Practical examples and laboratory activities can be added according to the college syllabus.

Page 3: Operating Systems & Networks

Topics covered:

- Processes and threads
- Memory and file management
- OSI and TCP/IP models
- Routing, switching and protocols

Learning Focus

This section introduces the important concepts of operating systems & networks. Students can use these topics as a starting point for lectures, assignments, revision and further study. Practical examples and laboratory activities can be added according to the college syllabus.

Page 4: Software & AI

Topics covered:

- Database management
- Software engineering
- Artificial intelligence basics
- Testing, version control and project development

Learning Focus

This section introduces the important concepts of software & ai. Students can use these topics as a starting point for lectures, assignments, revision and further study. Practical examples and laboratory activities can be added according to the college syllabus.
